PROFESSIONAL SUMMARY

Results-driven BTech student in Electronics and Communication Engineering (CGPA: 8.40) with strong programming proficiency in Python, C++, and web technologies. Proven ability to build end-to-end solutions spanning AI/ML integration, computer vision, embedded systems, and full-stack development. Hands-on experience developing real-world projects — including an intelligent desktop AI assistant, a myoelectric prosthetic arm, and smart assistive wearables — demonstrating both hardware-software versatility and a passion for innovation. Solid foundation in data structures, algorithms, object-oriented programming, database management, and RESTful APIs. Recognized for technical excellence through national-level hackathon qualifications and multiple competition wins. A quick learner with a quality-focused, collaborative approach, seeking a fresher IT role to apply and grow technical skills in a dynamic, problem-solving-driven environment.

EDUCATION

Pranveer Singh Institute of Technology (PSIT) CGPA: 8.40 <i>Bachelor of Technology in Electronics and Communication Engineering</i> Relevant Coursework: Python Programming, Data Structures and Algorithms, Database Management Systems, AI-ML.	Kanpur, Uttar Pradesh Dec 2022 – Jul 2026
--	--

TECHNICAL SKILLS

Programming Languages: Python, C++, C Programming, HTML5, CSS, JavaScript
Technologies & Tools: Computer Vision, Automation, Sensor Fusion, AI-ML, MATLAB, Git, RESTful APIs
Database Management: SQL, Database Design
Core Competencies: Object-Oriented Programming, Algorithm Design, Problem Solving, Software Development Lifecycle
Microsoft Office Suite: Word, Excel, PowerPoint (Intermediate Proficiency)
Behavioral Competencies: Analytical Thinking, Team Collaboration, Quality-Focused Approach, Leadership)

PROJECTS

Desktop AI Assistant <i>Python, AI/ML, GUI Development</i> - Developing an intelligent desktop assistant with voice recognition and natural language processing capabilities - Implementing visually attractive and user-friendly interface for seamless interaction - Integrating automation features to enhance productivity and user experience	Ongoing
Myoelectric Prosthetic Arm <i>Embedded Systems, SOLIDWORKS 3D Modeling</i> - Designed and developed an advanced prosthetic arm using myoelectric signals. - Implemented sensor fusion techniques for accurate gesture recognition and control - Created real-time signal processing pipeline for responsive prosthetic movements	2024
Smart Glasses for Visually Impaired <i>Computer Vision, Python, Sensor Fusion</i> - Developed wearable assistive technology using computer vision and object detection algorithms - Integrated audio feedback system to provide real-time environmental awareness - Optimized for low-power consumption and portability for practical daily use	2024

CERTIFICATIONS

Programming Specialization - Python (Basic) - Problem Solving (Basic) - Object-Oriented Programming using Python - HTML5 The Language	HackerRank & Infosys Springboard
Additional Certifications Agentblazer Champion	SalesForce TrailHead

ACHIEVEMENTS & AWARDS

Qualified for Smart India Hackathon 2024
Winner - Byte and Build
Winner - Trivia Time
Participant - Glam and Tech Hackathon
HackerRank Badges

National Level Competition
Circuit Design Competition
Technical Quiz Competition
Innovation Challenge
Python, C++, C
